**Galvanised and
Stainless Steel
Terminal Guards
for Balanced
Flue Boilers**

PRODUCT FEATURES

Available in rectangular, square and round options

- Manufactured from mild steel or stainless steel wire

- Zinc plated for added protection

- Special guards available to order

TECHNICAL INFORMATION

Check with boiler manufacturer to obtain correct guard size.

Guards should be installed to conform to recommended British Gas requirements.

Terminal Guards

Terminal guards are designed to protect balanced flues from damage when installed at low level, and to prevent any possible contact with the terminal.

Stainless steel guards are recommended for use with condensing boilers.
